

ANAESTHETIC DEPTH MONITORING

GUIDED TOUR

Saturday 03 June from 15:15 to 16:15 - Exhibition Hall

Tour Captain: Jan Hendrickx

TIME SCHEDULE

15:00 Arrival at ESAIC Hub

15:15 Start of the tour

15:18 to 15:45

BIS™ monitoring makes personalizing anaesthesia easier than ever

Presenter: Gaetane Van Geem

Medtronic
Engineering the extraordinary

Come and explore our new BIS™ innovation at the Medtronic booth. Medtronic will present you an easy to use and configure monitor that will improve your user experience with our BIS™ system. We will guide you through the improvements this system brings so together we can advance patient care.

15:47 to 16:13

Clinical Utility of the NeuroSENSE Bilateral Brain Function Monitor

Presenter: Stephane Bibian

 **NeuroWave**

This presentation will discuss the clinical utility of brain function monitors, and more specifically focus on the NeuroSENSE NS-901 Monitor (NeuroWave Systems Inc.). The monitor's features and proprietary algorithms will be presented. Case reports involving bilateral monitoring of patients undergoing cardiac and endarterectomy procedures will also be discussed to provide further insights on the sensitivity of the monitor to track brain perfusion and oxygenation.

16:15 End of the tour at ESAIC Hub
