

SZAIM - SUSTAINABLE ANAESTHESIA IN SLOVENIA

1 National policies

We do not currently have national policies regarding sustainable anaesthesia & ICU, but the conversation has begun.

2

Technological limitations

There are currently no technological limitations for adoption of more sustainable anaesthesia & ICU practices.

3 Exemplary practices

No centre in Slovenia has reported exemplary sustainability practices.

4

Barriers to sustainability

Lack of awareness and lack of interest among anaesthesia & ICU practitioners.

5 Future efforts

We joined ESAIC in working on Sustainability consensus document - representing Slovenia is dr. Andreas Kupsch. Regular society meetings will include lectures on sustainability.
