# PROMOTING RESEARCH AND PATIENT SAFETY

## Focus on the Patient Safety and Quality Committee

Patient Safety education at ESAIC is aimed at providing key knowledge on safety in acute settings: intensive care, anaesthesiology and perioperative care and emergency settings. Programmes are built on the overarching principles of the [Helsinki Declaration on Patient Safety in Anaesthesiology](#), the [Consensus Statement](#) of the multi-Society Patient safety Summit at the European Parliament, and the [WHO Multi-professional Patient Safety Curriculum](#). Our events are delivered by specialists in Patient Safety who are experts in education. We use an interactive, multi- platform approach, integrating technology and group work.

## Focus on the Research Committee

The Research Committee supports numerous research initiatives, including:

- The **Clinical Trial Network** : providing an infrastructure for Institutions, clinicians and scientists to work on collaborative observational research across international borders to improve patient care (SQUEEZE, MOPED, ENCORE, ARCTIC-I are currently recruiting)
- The **Academic-Contract Research Organisation (A-CRO)** : supporting clinical trials of healthcare sponsors and European sponsored projects and providing innovative solutions for trials to be conducted cost-effectively with the highest quality and speed.
- **The Research Groups** : helping group of experts on specific topics to develop standards, definitions, methodologies and perform research in the field of Anaesthesia, Perioperative Medicine, Intensive Care, Emergency and Pain Medicine.
- **ESAIC Grants** : promoting research in Europe and encourage our community to extend the frontiers of their practice.
- The **Mentorship Programme** : promoting one to one professional development of young researchers and experienced investigators.
