Obstetric Anaesthesia Serious Games

****IMPORTANT NOTICE:** access to Serious Games is limited to pre-registered delegates

About this session: Whether you are a trainee or an attending, this Serious Game will help you learn (or brush up on!) how to navigate the rollercoaster that can be associated with caring for the obstetric patient!

You will learn aspects of management using specifically designed games and structured debriefs to ensure the predefined learning goals are met.

Learning objectives: Upon completion of this Serious Game, participants should be able to:

- Identify women at risk for postpartum haemorrhage and quantify haemorrhage using all available information;
- Recognise various clinical scenarios in obstetric anaesthesia in which ultrasonography may aid in diagnosis and decision-making;
- Devise and implement management plans for maternal critical condition within the available setting, including massive transfusion;
- Debate optimal delivery anaesthesia for the unstable critically-ill pregnant woman;
- Incorporate crisis resource management tools in decision-making in critically-ill pregnant women.

Sunday

26 May 2024

14:00 – 15:30

Serious Game Zone

21SG1

Obstetric Anaesthesia Serious Game (1)
