

Beyond guidelines: implementation of a proven patient warming protocol – a European Consensus approach

Moderator – Dr Miguel Miro Murillo (Spain)

Independent Consultant Anaesthesiologist Madrid, Spain

Patient warming protocols – who, what, when and why?

Prof Dr. med Mathias Menzel (Germany)

*Head of the Department for Anaesthesiology, Emergency Medicine,
Operative Intensive Care Medicine and Pain Therapy (ANIS) Clinic Wolfsburg*

Patient warming protocols – the benefits and limitations

Dr Subramanian Ramani (United Kingdom)

*Consultant Anaesthetist and Chronic Pain Consultant, Northampton General
& Hospital Clinical Director, Outpatient Services, Northampton General Hospital*

Learning objectives

- Understand the clinical impact of preventing inadvertent perioperative hypothermia.
- Identify the key stakeholders and key responsibilities for the implementation of a proven patient warming protocol.
- Understand the benefits and limitations of different active warming strategies.
- Recognise the role of patient education in facilitating the implementation of a patient warming protocol.
